

T390F FILTER TANK | FILTER TANKS

With the ability to flow up to 700 GPM through two large filters, the Filtrific® T390F is the perfect solution for large, high-flowing water features. Innovative design elements such as a standard 6" intake port, which can be cut off to create a 10" intake port, allow for unlimited creativity when designing and building anything from landscape water features to architectural pools.

T390F FILTER TANK

MODEL: T390F

FEATURES:

- Weight: 256 lbs
- Dimensions: L: 70", W: 51.5", H: 48"
- 6" / 10" combination intake port handles flow rates up to 700 GPM (42,000 GPH)
- Handles flow rates up to 1,340 GPM (80,400 GPH) when used with RH15 series Filter Skimmers pg 32
- 390 gallon Filter Tank (provides 270 gallons of water-in motion reserve @ 9" residual water depth)
- Can be placed away from the water feature
- Accepts interchangeable skimmers
- Large pumping chamber
- Bolt down integrated lid system
- Convenient filter access (Filter Baskets purchased separately)
- Removable Filter Carriage
- Front & back discharge ports for up to four pumps
- Front and back additional capacity ports for expandable water containment
